

KID has been running its program since 2005. The main KID's program is Democracy School (Sekolah Demokrasi – SD) which has been established in five regents (Tangerang, Banyuasin, Jenepono, Lembata and Malang). Within five years there have been so much experience and lessons learned. To capture those experiences, five Democracy School coordinators share their experience in this book about the innovative features and promising values of Democracy School in coping with democratization challenges in Indonesia.

This book also serves information and experience in managing SD program with its results. We hope this book can invite and encourage readers to participate in SD program.
